Ukushisa Services is a SME company. Jasper Consultants introduced us to the Google Campaign. This has given us an edge over our competitors as we no longer need to spend hundreds of hours on the road looking for business. The business comes to us 'Virtually'. Those in need of our services contact us directly, saving us many man hours trying to solicit sales especially in these tough economic times. From the start of the Google Campaign with Jasper Consultants, enquiries have poured in daily and our sales have increased dramatically. The money invested in the Google Campaign has been recouped within the first month.

We found Jasper Consultants to be a team of professionals who have assisted us all the way. They helped us develop a highly professional website and the Google Campaign was introduced and producing results within days. We highly recommend that any business or organization make use of this incredible marketing tool.

Derek Orford - Managing Director

Simon Chaba - Director of Operations
